

POD Pro H-Top Drain

Solutions for Vinyl Flooring Applications

Meet challenges in POD construction with this innovative new H-Top drain. It includes an integral clamping frame that is ideal for vinyl flooring.

The low profile and patented drop-in outlet make it ideal for commercial POD construction. Shallow assembly height allows finished floor and water proofing membrane to remain intact while avoiding obstructions. ADA and heel-proof compliant. Comes in stainless steel and nickel bronze.

The Zurn Advantage Your Full Range of Drainage Solutions

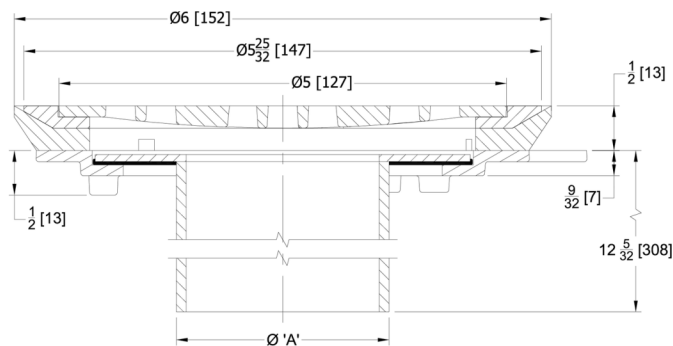

- Ideal for POD construction
- Works well in health care environments
- Seamless installation – clamps to top of finished floor
- Patented drop-in outlet allows finished floor and waterproofing membrane to remain intact
- Save money on flooring with shallow 1" assembly height
- Compatible with ZPD1 options
- Part of the Zurn POD Pro Drainage Solutions

POD Pro H-Top Drain

Engineering Specification

ZPD1-H ZURN POD Pro Shallow Floor and Shower Drain with Clamping Frame and drop-in outlet exclusively for vinyl sheet flooring, is engineered to reduce installation time, and provide job site flexibility. Drain comes standard with low-profile, $\frac{1}{2}$ " [13mm] deep, Type 304, cast stainless steel body with 12" [350mm] long independent, Type 304, stainless steel drop-in bottom outlet, neoprene outlet gasket, stainless steel membrane clamp and frame with integral seepage slots, combination nickel bronze or stainless steel flashing clamp device for securing vinyl sheet flooring at the finished floor level, and polished nickel bronze or stainless steel, heel-proof, round light-duty secured strainer with strainer label for protection during installation. Drain body also includes three securing flanges designed to allow the drain to be quickly and easily mechanically fastened to any flooring surface.

Note: Design and dimensional data (inches and [mm]) are subject to manufacturing tolerances and change without notice.
